

YESLY X EASY TO BE SMART

THE PROFESSIONAL
SMART HOME SYSTEM

VISION

PROFESSIONAL SMART HOME, MADE SIMPLE

YESLY X IS A PROFESSIONAL
SMART HOME SYSTEM
DEVELOPED BY FINDER.
INTEGRABLE, SECURE AND
SCALABLE, IT IS IDEAL
FOR RENOVATIONS, SYSTEM
UPGRADES AND NEW
CONSTRUCTIONS.

Built within an ISO/IEC 27001–certified organization, YESLY X combines:

- The reliability of a Bluetooth® Mesh connection;
- The convenience of Wi-Fi control via app, including remote access;
- The native compatibility with voice assistants.

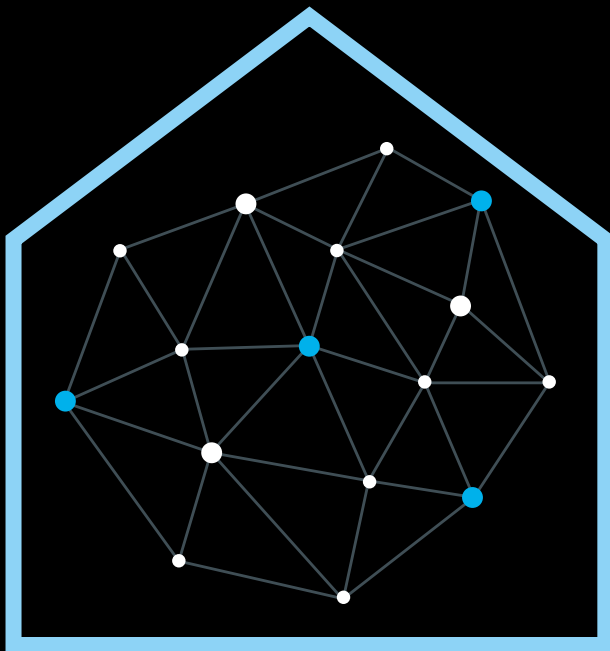

70 YEARS OF RELAYING INNOVATIONS

Finder is the Italian leader in electronic and electromechanical devices for residential and commercial electric systems. Reliability & Innovation backed by more than 70 years of industrial expertise.

WHY YESLY X

BUILT FOR INSTALLERS

YESLY X is based on a scalable Bluetooth® Mesh architecture where each device strengthens coverage and reliability.

The system works locally and autonomously. Remote access can be added when needed — without creating cloud dependency.

FOR INSTALLERS

Plug & Play installation

Installs like a traditional relay.
No additional time required.

No smartphone needed on site

Configuration is done directly on the device.

Bluetooth® Mesh reliability

Each device extends the network.
No repeaters. No complex setup.

Always operational

Works with or without internet connection.

FOR USERS

Intuitive app

Clear interface. Stable performance.

Guided setup

Step-by-step configuration.

Smart suggestions

Context-based routines.
Fully customizable.

CAPABILITIES

WHAT YOU CAN DO

YESLY X gives you direct control over the core functions of a smart electrical system. Lights, roller shutters, loads, locks, temperature and comfort. With YESLY X your smart home has no limits.

LIGHTS

On/off control and dimming, designed for everyday comfort and advanced lighting scenarios.

ROLLER SHUTTERS

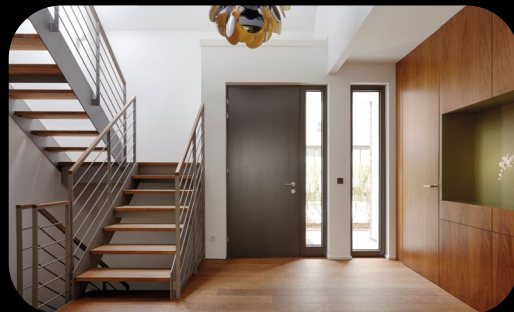

Precise control of opening and closing, with support for automation and coordinated movements.

CLIMATE

Your home, your climate. Plan and manage your home temperature and humidity with comfort and precision, via app or voice command.

LOADS

Smart management of sockets, electric locks and other connected loads, fully integrated into the system.

APPLICATIONS

IDEAL FOR EVOLVING INSTALLATIONS

RESIDENTIAL AUTOMATION

YESLY X is designed for simple automation of roller shutters, blinds, lights and electrical devices in the home.

It is suitable for renovations and system upgrades, as well as for new constructions.

SCALABLE ENVIRONMENTS

Built on Bluetooth® Mesh, the network expands naturally with the installation. Each device strengthens coverage and reliability — without dedicated range extenders.

Thanks to the reliability of the Mesh architecture, YESLY X is suited for environments such as offices and commercial buildings.

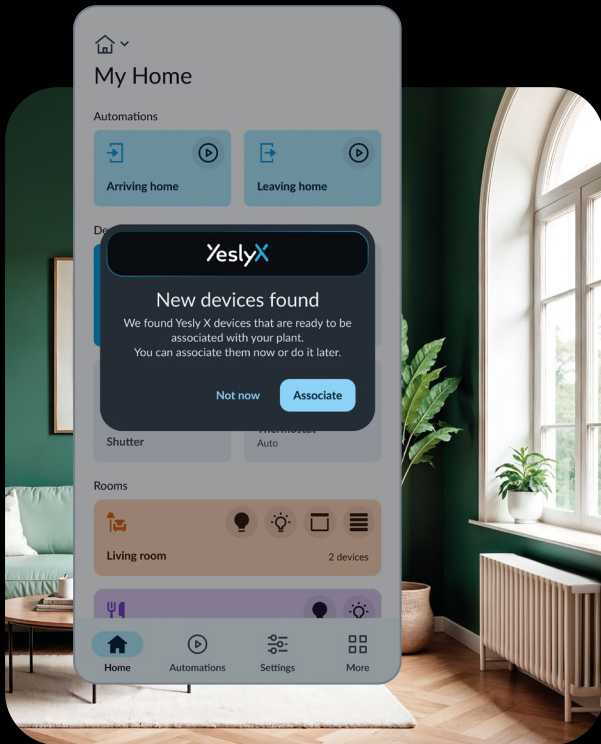

ENERGY MONITORING

YESLY X enables energy metering across a wide range of connected devices.

Different application modes allow precise monitoring of consumption, offering clear control over how energy is used.

USER EXPERIENCE

A TRULY SMART USER EXPERIENCE

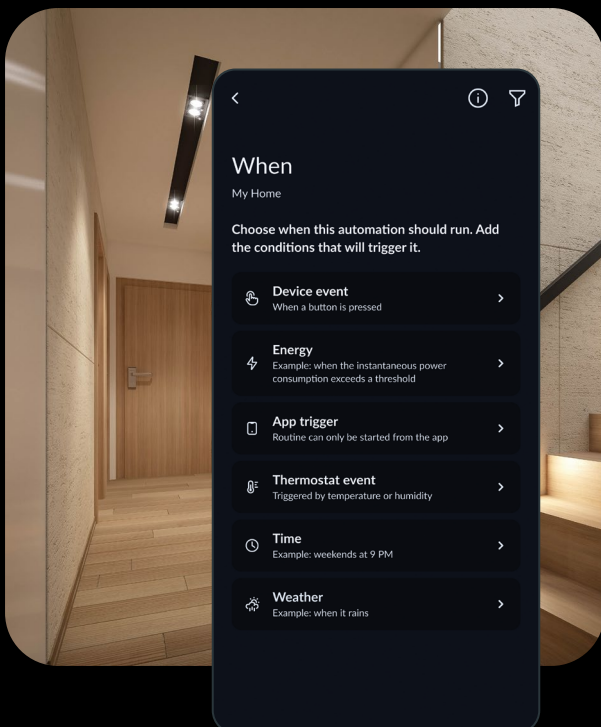

A SMART START

From the very first activation, YESLY X understands the installed setup. It detects new devices automatically and guides users through room assignment and naming in a simple, structured way. No manuals. No complex procedures.

GUIDED INTERACTIONS

A smart assistant supports configuration and everyday actions through contextual suggestions and step-by-step guidance. Operations that would normally require multiple steps become intuitive and accessible.

ADVANCED ROUTINES

Tailor your smart home perfectly to your lifestyle. The app allows you to create custom automations triggered by astronomical events, energy consumption, and much more. Plus, you can seamlessly create mixed routines to centrally control your YeslyX, S Series, and Bliss devices all at once.
